DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 3-12, 14-23, 34 and 35 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter.

Claims 1, 12, and 23 recites, inter alia, a method/system for connecting a device to a central system, comprising "detecting the insertion of a cable connector into a slot in said central system", "reading, through said slot, configuration information stored in a memory contained within said cable connector, wherein said configuration information includes a values describing a type of said device", and "modifying, by said central system, said value describing said type of said device and writing said modified value describing said type of said device from said central system through said slot, wherein said writing causes said modified value describing said type of said device to be stored into said memory contained within said cable connector". Prior art of record do not teach or suggest, either alone or in combination, the aforementioned limitation, nor would it be obvious to modify those references to include such limitation. Examiner notes that applicant's arguments are persuasive regarding the above limitations.
